Subject index

Volume 6

Acid-hydrolyzed starches
characterization 371
Alkaline-earth metal ions
carboxymethylcellulose, complexation, aqueous systems, molecular model 379
Arabinoxylan dispersions
rye bran, flow properties 437

Bacterial cellulose
development of new form 493
gelatinous cellulose for food materials, processing 479
processed foods application 503
production by *Acetobacter aceti*, 2-stage fermentation 471

Carboxymethyl cellulose
influence of, flavour perception and sweetness 525
Carboxymethylcellulose
alkaline-earth metal ions, complexation, aqueous systems, molecular model 379
Carrageenan–gum
gels, composite mechanical behaviour 275
β-Casein
phosvitin, flocculation of emulsions, calcium induced 359
sucrose esters, interaction 173
Coconut protein
isolation/characterization 301
Competitive displacement of protein
from emulsion droplet surface by surfactants, temperature dependence 163

Disaccharides
stabilities of rice starch gels 387
DSC
thermal reaction kinetics 543

Emulsion
oil-in-water, non-ionic surfactant, stabilisation 415
Emulsions
films and highly concentrated, stabilization, adsorption layers of macromolecules 45
n-decane droplets, aqueous solution containing 11S globulin and dextran, adsorbing layers, effect of incompatibility 237
L-tryptophan, vitamin B2, controlled release 443

Flavour perception
sweetness, influence of oat gum, guar gum, carboxymethyl cellulose 525
Flocculation of emulsions
calcium induced, β-casein, phosvitin 359

Galactan
gelation mechanism 25
Galactomannans
leguminous plant seeds 3
Gamma irradiation
guar gum, locust bean gum, gum tragacanth, gum karaya, effects 559
Gelation
glucono-δ-lactone, effect on time, soybean 11S protein, concentration dependence 263
thermotropic of food proteins 69
Gels
carrageenan–gum, composite mechanical behaviour 275
thermally induced globular, formation, melting, restoration 97
Globular proteins
aqueous solutions, ultrasound 253
hydrated and dehydrated, heat capacity, denaturation increment of 513
Glucono-δ-lactone
effect on gelation time, soybean 11S protein, concentration dependence 263
Guar gum
gamma irradiation, effects 559
influence of, flavour perception and sweetness 525
Gum karaya
gamma irradiation, effects 559
Gum tragacanth
gamma irradiation, effects 559

Heat capacity
denaturation increment of, hydrated and dehydrated globular proteins 513
Hydrocolloids
microwave dielectric properties, moisture/temperature/stoichiometric charge variation 315

Infrared spectroscopy
pectic substances 115
Inhomogenous fine-stranded gels
β-lactoglobulin 455

Kinetic treatment
rheological properties, effects of saccharides on retrogradation of rice starch gels 187
Konjac mannan
physico-chemical characteristics, review 199

β-Lactoglobulin
inhomogenous fine-stranded gels 455
lecithin, adsorbed films, hydrocarbon–water, triglyceride–water interface 533
sucrose esters, interaction 173
Lecithin
β-lactoglobulin, adsorbed films, hydrocarbon–water, triglyceride–water interface 533
Legumins
liquid–liquid phase equilibria, effects of pH 147
Liquid–liquid phase equilibria
effects of pH in legumins, vicilins from broad beans, peas 147
Locust bean gum
gamma irradiation, effects 559

Microwave
hydrocolloids, dielectric properties, moisture/temperature/stoichiometric charge variation 315
Monosaccharides
stabilities of rice starch gels 387

Non-starch polysaccharides
water soluble, wheat, rye, triticale, barley, oats, physical properties 329

Oat gum
influence of, flavour perception and sweetness 525
Oligosaccharides
stabilities of rice starch gels 399

Pectic substances
infrared spectroscopy 115
Phosphoprotein complexes
phosvitin and bovine casein micelles, interactions 153
Phosvitin
β-casein, flocculation of emulsions, calcium induced 359
Polysaccharides
sulfated, red seaweeds 9
water soluble non-starch, isolation, separation, characterization 285
Protein
coconut, isolation/characterization 301
globular, aqueous solutions, ultrasound 253
thermally induced globular gels, formation, melting, restoration 97
thermotropic gelation 69
Protein–polysaccharide complexes
adsorption, computer simulation model 345

Rye
water soluble non-starch polysaccharides, isolation, separation, characterization 285
Rye bran
arabinoxylan dispersions, flow properties 437

Saccharides
stabilities of rice starch gels, monosaccharides, disaccharides 387
stabilities of rice starch gels, oligosaccharides 399
Starch emulsifier complexation
low concentration starch systems, gelation induced 223
Sucrose esters
β-lactoglobulin, β-casein from bovine milk, interaction 173
L-tryptophan
controlled release from emulsions 443

Vicilins
liquid–liquid phase equilibria, effects of pH 147
Vitamin B2
controlled release from emulsions 443

Wheat
water soluble non-starch polysaccharides, isolation, separation, characterization 285
Whey proteins
fractal aggregation 423
thermal reaction kinetics by DSC 543
